WASHINGTON, D.C. 20549**

FORM 8-K

CURRENT REPORT

Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Date of Report (Date of earliest event reported): November 06, 2025

IN8bio, Inc.

(Exact name of Registrant as Specified in Its Charter)

Delaware
(State or Other Jurisdiction
of Incorporation)

001-39692
(Commission File Number)

82-5462585
(IRS Employer
Identification No.)

350 5th Avenue, Suite 5330
New York, New York
(Address of Principal Executive Offices)

10118
(Zip Code)

Registrant's Telephone Number, Including Area Code: 646 600-6438

Not Applicable

(Former Name or Former Address, if Changed Since Last Report)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, \$0.0001 par value per share	INAB	The Nasdaq Stock Market LLC

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§ 230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§ 240.12b-2 of this chapter).

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Item 2.02 Results of Operations and Financial Condition.

On November 6, 2025, IN8bio, Inc. (the “Company”) issued a press release announcing its financial results for the third quarter ended September 30, 2025. A copy of the press release is furnished as Exhibit 99.1 to this Current Report on Form 8-K and is incorporated herein by reference.

The information in this Form 8-K, including Exhibit 99.1 hereto, shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or otherwise subject to the liabilities of that section, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as expressly set forth by specific reference in such a filing.

Item 9.01 Financial Statements and Exhibits.

d) Exhibits.

<u>Exhibit No.</u>	<u>Description</u>

IN8bio Reports Third Quarter 2025 Financial Results and Recent Business Highlights

- Presented new preclinical data on INB-619, a novel gamma-delta ($\gamma\delta$) T cell engager (TCE), demonstrating equivalent potency comparable to FDA-approved commercial products with minimal adverse cytokine release, highlighting its potential to achieve deep B cell depletion with an improved safety profile
- Expanded Phase 1 INB-100 trial to The James Comprehensive Cancer Center at The Ohio State University, supporting faster enrollment to complete the Phase 1 expansion cohort
- Continued to advance IN8bio's proprietary $\gamma\delta$ T cell platform with ongoing pipeline progression and updated INB-200/400 clinical data in newly diagnosed glioblastoma (GBM) to be presented at the 2025 Society for Neuro-Oncology (SNO) Annual Meeting

NEW YORK, November 6, 2025 - [IN8bio, Inc.](#) (Nasdaq: INAB), a clinical-stage biopharmaceutical company developing innovative gamma-delta T cell therapies for cancer and autoimmune diseases, today reported financial results and business highlights for the third quarter ended September 30, 2025.

Key Highlights:*Presented New Preclinical Data on INB-619 at ACR Convergence 2025*

- IN8bio presented compelling new preclinical data on INB-619, its CD19 targeting $\gamma\delta$ TCE, at the 2025 American College of Rheumatology (ACR) Convergence Meeting. In preclinical systemic lupus erythematosus (SLE) donor models, INB-619 achieved complete elimination of B cells with efficacy equivalent to commercial CD19 and CD20 engagers, including the FDA-approved compounds *blinatumomab* and *mosunetuzumab*.
- The data showed that INB-619's selective $\gamma\delta$ T cell activation drives deep B cell depletion with minimal cytokine release, confirming the potential for improved safety over conventional CD3-directed engagers in development.
- INB-619's targeted immune activation and cytokine-sparing design could allow for higher doses, deeper B cell depletion and immune reset that has not been observed with other protein engagers to date.

Expanded INB-100 Clinical Trial to Multiple Sites

- IN8bio expanded the Phase 1 trial of INB-100 to include The Ohio State University (OSU), diversifying centers and accelerating patient enrollment.
-

- The addition of Sarah A. Wall, M.D., the Director of Clinical Operations for the Transplant and Cell Therapy Program and an expert in elderly patients with leukemias from this leading academic institution, underscores the strong clinical interest in advancing INB-100, a donor-derived, allogeneic $\gamma\delta$ T cell therapy in patients with leukemias undergoing haploidentical stem cell transplantation.

William Ho, CEO and co-founder of IN8bio, commented, “During the quarter, we continued to execute on our goal of developing next-generation $\gamma\delta$ T cell therapies. Our focus on the novel biology of $\gamma\delta$ T cells underscores our advancements along with the strength and versatility of our DeltEx™ platform. This quarter, we expanded our INB-100 clinical operations to additional sites to accelerate enrollment, and we reported compelling preclinical data at the 2025 ACR Convergence Meeting. Our INB-619 program is a novel and differentiated program in a sea of CD3-based TCE’s that have yet to achieve immune reset in the autoimmune disease setting. We remain focused on delivering the next generation of $\gamma\delta$ T cell therapies designed to redefine immune modulation and improve patient outcomes.”

Upcoming Anticipated Pipeline Milestones and Events

- Updated Phase 1 and 2 data from the INB-200/400 program in newly diagnosed GBM to be presented at the SNO Annual Meeting, November 19-23, 2025
- Additional preclinical data from INB-619 $\gamma\delta$ T cell engager program in oncology will be presented at the American Society of Hematology (ASH) Annual Meeting, December 6-9, 2025

Third Quarter 2025 Financial Highlights

- **Research and Development (R&D) expenses:** R&D expenses were \$2.1 million for the three months ended September 30, 2025, compared with \$3.3 million for the comparable prior year period. This amount includes non-cash items such as stock-based compensation (SBC) and depreciation of \$0.5 million for the three months ended September 30, 2025. The change was primarily due to a strategic pause on clinical trial-related activities for the INB-400 program last year and personnel-related costs, which followed the Company’s pipeline prioritization announcement in September 2024. The Company continues to prioritize programs demonstrating the strongest clinical signal and commercial opportunity.
 - **General and administrative (G&A) expenses:** G&A expenses were \$1.9 million for the three months ended September 30, 2025, compared with \$2.7 million for the comparable prior year period. This amount includes non-cash items such as SBC and depreciation of \$0.4 million for the three months ended
-

September 30, 2025. The change was primarily due to cost savings related to personnel-related costs, director and officer insurance premiums and professional services.

- **Net loss:** The Company reported a net loss of \$3.9 million, or \$0.85 per basic and diluted common share, for the three months ended September 30, 2025, compared with a net loss of \$7.1 million, or \$4.49 per basic and diluted common share, for the comparable prior year period.
- **Cash position:** As of September 30, 2025, the Company had cash of \$10.7 million, compared with \$4.0 million as of September 30, 2024.

About IN8bio

IN8bio is a clinical-stage biopharmaceutical company developing $\gamma\delta$ T cell product candidates for unmet medical needs. $\gamma\delta$ T cells are a specialized population of T cells that possess unique properties, including the ability to differentiate between healthy and diseased tissue. The Company's lead program, INB-100, is focused on acute myeloid leukemia, evaluating haplo-matched allogeneic $\gamma\delta$ T cells given to patients following a hematopoietic stem cell transplant. The Company is also evaluating autologous DeltEx DRI $\gamma\delta$ T cells, in combination with standard of care, for glioblastoma in its INB-200 and 400 programs, and INB-600, advancing novel $\gamma\delta$ T cell engagers for potential oncology and autoimmune indications. For more information about IN8bio, visit www.IN8bio.com.

Forward Looking Statements

This press release may contain forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements may be identified by words such as “aims,” “anticipates,” “believes,” “could,” “estimates,” “expects,” “forecasts,” “goal,” “intends,” “may,” “plans,” “possible,” “potential,” “seeks,” “will” and variations of these words or similar expressions that are intended to identify forward-looking statements, although not all forward-looking statements contain these words. Forward-looking statements in this press release include, but are not limited to, statements regarding: the potential to accelerate enrollment of the Phase 1 trial of INB-100; the potential of INB-619 to achieve deep B cell depletion and immune reset with an improved safety profile over conventional CD3-directed engagers in development, including the potential for higher dose levels; IN8bio's ability to develop gamma-delta T cell therapies that redefine immune modulation and improve patient outcomes; IN8bio's ability to achieve anticipated milestones, including expected presentations and data readouts from its trials and advancement of clinical development plans; and other statements that are not historical fact. IN8bio may not actually achieve the plans, intentions or expectations disclosed in these forward-looking statements, and you should not place undue reliance on these forward-looking statements. Actual results or events could differ materially from the plans, intentions and expectations disclosed in these forward-looking statements as a result of various factors, including: risks to site initiation, clinical trial commencement, patient enrollment and follow-up, as well as IN8bio's ability to meet anticipated

deadlines and milestones; uncertainties inherent in the initiation and completion of preclinical studies and clinical trials and clinical development of IN8bio's product candidates; the risk that IN8bio may be unable to raise additional capital and could be forced to delay, further reduce or to explore other strategic options for certain of its development programs, or even terminate its operations; IN8bio's ability to continue to operate as a going concern; the risk that IN8bio may not realize the intended benefits of its DeltEx platform; availability and timing of results from preclinical studies and clinical trials; whether the outcomes of preclinical studies will be predictive of clinical trial results; whether initial or interim results from a clinical trial will be predictive of the final results of the trial or the results of future trials; the risk that trials and studies may be delayed and may not have satisfactory outcomes; potential adverse effects arising from the testing or use of IN8bio's product candidates; the uncertainty of regulatory approvals to conduct trials or to market products; IN8bio's reliance on third parties, including licensors and clinical research organizations; and other important factors, any of which could cause our actual results to differ from those contained in the forward-looking statements, which are described in greater detail in the section entitled "Risk Factors" in our Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission (SEC) on August 7, 2025, as well as in other filings IN8bio may make with the SEC in the future. Any forward-looking statements contained in this press release speak only as of the date hereof, and IN8bio expressly disclaims any obligation to update any forward-looking statements contained herein, whether because of any new information, future events, changed circumstances or otherwise, except as otherwise required by law.
